WELCOME

Stu and I were blessed to take over the reins of this beautiful herd of cows in 2013 that my father first started in 1947. We were fortunate in that time to spend many hours with he and mum in the cattle yards and in the paddock understanding and appreciating the power of female lines, how to breed good cattle and the pure joy that comes from the pursuit of excellence.

We have significantly increased our flush program over recent years with the plan to have a mature female sale every three years. This is the first of those and we are very excited to share our genetics with the broader industry. There are many uniquely Ben Nevis pedigrees here that have been gold for us and our cutting edge and we hope that they provide as much success and joy for their new owners as they have for us.

These cows are joined the exact same way as those that are left and the embryo's in utero are the same as offered in our donors so we are offering people the chance to tap directly into the heart of our breeding programme.

Ben Nevis is one of Australia's oldest Angus herds. Running 900 Angus cows (including 600 commercials) in the high, temperate grasslands of Walcha NSW. The Ben Nevis herd has enjoyed a well earned reputation for quality and service.

In 2013 we moved to an on-property auction to allow our clients fairer access to the bulls. Since then we have been recognised as the most successful Angus Yearling Bull Sale in the country, topping the list of averages for this category from 2013 to 2018 (well above the breed average), and in 2017 making one of the top ten sales in the country.

In recent times our bulls have been in high demand as Stud Sires with the following of note.

- 2020 Ben Nevis Quantum \$40,000 to Bowmont, Ben Nevis Qarma \$24,000 to Noonee Angus, Ben Nevis Quambone \$16,000 to Bowenfells Angus
- 2019 Ben Nevis Prime \$30,000 to Bannaby Angus, Ben Nevis Propagate \$28,000 to Merit Farms
- 2018 Ben Nevis Nirvana \$26,000 to Innesdale Angus Stud, Ben Nevis Newsflash \$24,000 to Bannaby Angus, Ben Nevis Napoleon \$18,000 to Coolie Angus
- 2017 Ben Nevis Metamorphic \$32,000 to syndicate Banquet, Twin Oaks (NZ), Fernleigh (NZ), Atahau (NZ), Ben Nevis Massive \$30,000 to Valorbook Angus, Ben Nevis Manchester \$18,000 to Knowla Angus.
- 2016 Ben Nevis Loaded Gun \$26,000 to Cascade Angus, Ben Nevis Landslide \$20,000 and Ben Nevis Legendary \$18,000 to Valorbrook and Ben Nevis Lucrative \$18,000 to Coolie Angus

This catalogue encompasses all our mature aged females including our F, G, H, J, K and L cows and Donors in these categories. They will be sold in two sections – Spring Cows and Calves at foot followed by Autumn Cows PTIC.

Please call with any questions. Inspections by appointment are encouraged.

With best wishes,

Stu and Erica (Hap) Halliday

SALE INFORMATION

INAUGURAL BEN NEVIS MATURE FEMALE DISPERSAL

OPEN DAY 12 October, 1.00pm – 5.00pm
Drinks and light supper to follow.
RSVP essential – please text Erica with numbers to 0427 780 154

SALE SAY 13 October, inspection from 8.00am, sale 11.00am

Extensive undercover protection is in place.

LOCATION

645 Brackendale Road, Walcha.

From Walcha take the Oxley Highway and head east towards Port Macquarie. Approximately 4kms out of Walcha turn right onto the Brackendale Road. The Mingary woolshed and yards are approximately 7kms along the Brackendale Road on the left hand side, and will be well sign posted on sale day!

ACCOMODATION

Walcha Visitor Information Centre (02) 6774 2460.

There are two motels, and two hotels in Walcha. We are an hours drive from Armidale and 1 ¼ hours drive from Tamworth. Both are larger regional centres with Airports.

COVID SAFE

COVID-19 rules will apply we will be required to get details of attendee's. There is adequate space for social distancing and hand sanitiser will be readily available. Large television screens will livestream the sale inside the larger area of the woolshed if available seating becomes limited with adequate spotters to take bids.

INSPECTIONS

Pre-sale inspections are available by appointment.

Please call Erica 0427 780 154 or Miles Archdale from Nutrien Boulton's 0428 660 326 to arrange.

REFRESHMENTS

Refreshments will be available in accordance with COVID-19 regulations, with afternoon tea and a light supper on the Open Day 12 October, as well as morning and afternoon tea and lunch on Sale Day.

INSURANCE

Will be available on sale day through CGU and WFI via Nutrien Boultons.

REGISTRATION

Ownership of the cows will be transferred to the vendors with Angus Australia provided accurate transfer details are supplied with the Buyers Instruction Slip.

GST

All animals are sold exclusive of GST.

REBATE

A 2% rebate is allowed to reciprocating agents accompanying a buyer to the sale, provided they have registered in writing 24 hours before the sale and settle on their behalf within seven days of the invoice.

CARTAGE/TRANSPORT

All instructions for transport must be in writing. Transport will be coordinated by Lockie Falls Transport 0429 826 342. Buyers Instructions Slips must be completed prior to departure from the sale.

SAFETY

At the sale, please do not enter the pens unnecessarily and do not crowd the animals. No children are permitted to enter the pens.

PHONE AND ONLINE BIDDING

We have a mobile booster installed and the sale will be interfaced with Elite Livestock Auctions, or you can contact the selling agents. For instructions on how to register and bid online please see page 72.

PARENT VERIFICATION SUFFIXES

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name are as follows:

PV	Both parents have been verified by DNA
SV	The sire has been verified by DNA
DV	The dam has been verified by DNA
#	DNA verification has not yet been conducted
E	DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

ABOUT THE COWS

LOT ORDER

LOT 1 – 61 Spring Cows with Calves at foot. In year and tag order.

LOT 62 – 118 Autumn Cows PTIC. In year and tag order.

We believe in every cow in the sale and as cows are a very personal preference we have lotted them from youngest to oldest in year groups for Spring and Autumn and within the year groups we have simply lotted them in tag order. The only exception to this is the Jean Donors Lot 14 H215 and Lot 15 K80 and Lot 23 H103 with a number of requests to move them further up the sale catalogue.

DONORS

With the exception of Donors Lot 14 H215 and Lot 15 K80 and Lot 23 H103 the donors have simply been lotted with their year group and in tag order as the rest of the cows. They will however be penned separately on Sale day because of their large size, courtesy of the ET drugs and a good season.

They have had no special treatment since flushing but managed to waddle through the worst drought in living history growing even larger on meagre rations in confinement. All bar one (J115) who was flushed most recently are back in calf as the catalogue goes to print.

HEALTH

The Ben Nevis herd holds a JBAS-7 status. They have been treated with 7 in 1 and Pestiguard as well FasineX Oral and Eprinex Pour-on on 15/09/2020.

The routine vaccination program for the herd includes giving the cows an annual multimin, Vitamin B12 and Selenium and Pestiguard prior to joining. In addition before they calve each year they get a booster 7 in 1, Pestiguard, Eprinex or Ivomec pour on and a Fascinex. Fluke is an issue in our country and you should treat again after arrival at home to ensure all immature fluke are accounted for.

JOHNES STATUS

We are tested JBAS-7.

PREGNANCY STATUS

The cows sell either as Spring or Autumn Calvers. At the time of printing a number of the Spring Calvers have already calved and the calf details are highlighted in the Lot. Additional calf details will be available by supplementary sheet. All but three Spring cows should have calved by sale time.

The cows were foetal aged for pregnancy on July 12 by Christopher Hallet BVs MVSt of Coolah Veterinary Hospital to determine if the cows were pregnant to AI or the back-up bull. Subsequent preg test were undertaken on 12/8/2020 to determine pregnancy status to back up bulls in the Autumn program. The detected sire is shown in the comments as well as an average of the predicted EBVs for the progeny.

SPECIAL NOTES

Because we run a large commercial herd alongside the stud our cows can alternate between being on the inventory and not as we have a very tight joining in the Stud to produce yearling bulls. Some cows go to the commercial program but because they have such good calves they can work their way back onto the inventory.

Any cow not in calf is sent to slaughter. Usually this is without exception but last year when our cows were in confinement we were sent a bad feed source at the time of joining. This resulted in a disastrous conception rate. Rather than re-join the cows for a summer calf we held them over to an Autumn calving. All Spring cows in the sale had their calves very early weaned down to six weeks to lower feed costs and in an attempt to increase conception rates during that very difficult time.

HISTORY

During the 1902 drought the Steel family changed completely over to Angus when the Shorthorns they had died on the rivers while the Angus survived by climbing and foraging in the hills, (sorry Shorthorn lovers).

So they became the breed of choice for my family because of what was referred to as constitution and doing ability. The Steels planned on a stud and travelled to Bald Blair where they purchased their original foundation females complete with name plates which hung on chains around their necks and proceeded to walk them the 160kms back home. Unfortunately the chains eventually wore and the plates fell off however this was the beginning of the highly regarded Ben Nevis commercial herd.

The stud did not form until 1947 after Bruce Steel (my father and Ben Nevis Founder) returned from WW2. During the war an underage Bruce was dispatch rider for none other than HG Munro of Booroomooka and he inspired him to start an Angus Stud. He did this with his father in 1947 with the Abington dispersal and he purchased his Foundation Sire Booroomooka Assian for 1,000 guineas, the top price bull as well as Junior Champion bull at Sydney that year.

And so began a whole way of life, living and breathing the Angus breed as a single source of passion and joy. There have been many successes topping the Walcha weaner sales, NEAB Bull Sales and in

the show ring. Most notable of these was Champion of Champion at the Brisbane EKKA in 2008 and Grand Champion Angus bulls at Sydney and Brisbane Royal, but perhaps Dad's greatest success has been his clients with multi generations of his original clients still purchasing bulls today including the Thomson and Lockyer families of Walcha.

Today Ben Nevis is a fourth generation family business with all the family involved including Cherry and Kylie Steel and kids Jack and Maggie Halliday and Bonnie Cox.

Bruce passed away at the age of 93 in 2017 and is fondly remembered as an inspiration and mentor to many Angus breeders, as well as being the ultimate feminist. He always told me that women could do anything and strongly believed in their natural ability with cattle, dogs and horses.

Bruce and Cherry ran the original Roundup with Jason Strong and were recognised as the inaugural recipients of the Stewarts Award for services to Angus Youth – of this award he was most proud. Stu and I were also honoured to receive this award in 2008. In addition, Dad and Mum are both honorary members of Angus Australia where Bruce was a Councillor, Chairman of NSW State Committee and New England Angus Breeders.

He loved his Angus family as we still do today.

Clockwise from above: Bruce Steel in 2010 with the top priced weaners at the Landmark Walcha Weaner sale. Bruce Steel, Erica Halliday and Ben Nevis Arod Champion of Champions Brisbane Royal 2008. Bruce Steel and Richard White with Ben Nevis Crusader W38 Jn Champion Sydney Royal 1979. Ben Nevis Xmas Jn and Grand Champion Brisbane Royal 1980.

OUR PHILOSOPHY

There is, in our heads a big difference between simply multiplying genetics and the art of breeding and there is no greater leverage than blending complementary types and understanding the power of female lines. It is the key to not only our unique edge but consistency.

Ben Nevis is 4,000 (sometimes wild) acres, reaching 1,350m above sea level in temperate often frigid conditions that require cows to climb, work and forage. It runs up to 1,100 cows.

We don't select females but allow our harsher environment to test the animals and we simply multiply those that thrive via ET and cull for temperament, feet and infertility.

It would have been easy to use paper and EBVs to create cattle but nothing worthwhile is easy and we have never been willing to compromise on those traits that first made the breed so valuable to my forebears. So while it's old fashioned to talk and breed skin, muzzles, flanks and spines it matters to us and sets us apart. We believe in going the extra mile to create big lines of beautiful, quiet cattle that are rich in old fashioned quality indicators and injected with the latest carcase to target modern and premium markets.

We are fiercely proud to be a family-run beef business committed to regenerating the land. We want to teach our kids the value of hard work and the importance of integrity and humility, and instill in them good old "sacred site" and "sacred cow" syndromes.

OUR BRAND

Our brand defines us. The triangle being the strongest of forms represents the mountain where we live (Ben Nevis), and what we strive to do well. Quality, Integrity, Family.

Above from left: Erica Halliday, her father Bruce Steel (founder of Ben Nevis) and Stuart Halliday. Below left: Erica Halliday, Maggie Halliday, Stuart Halliday and Jack Halliday.

Geranium L2 is the granddaughter of our prolific matron – Donor Cow Geranium D40. She has lovely fine skin and type associated with all the Judo's, and the doing ability to go with it. Our Judo's are outcrosses and are fast becoming the high performing cow group here with our top two Q bulls out of Judo first calvers by Beast Mode. Her joining sire was the pick bull of the P year from our G22 donor line by Prophet.

A really neatly made and balanced young cow with a thumping calf at foot. She has a beautiful fine, skin and has a lovely head with the extra girth, wedge shape and doing ability the Comrades are known for. This joining to Propagate is complementary and should be very exciting – sexy numbers and phenotype.

 IDEAL 4465 OF 6807 4286* VERMONT WILCOOLA Z334*

L31 is a treasured donor from one of only two introduced female lines here – the Wilcoola family. She leaves us with three retained cracking daughters and Stud Sire Ben Nevis Prospector P412. She adds more dimension in the form of scale, rib and flank and she coats everything in quality. Her maternal brother sold to stud duties last year to Banquet. Her dam (also a Donor), G4 sells as Lot 110 and she is the maternal sister to Lot 85 – K94.

 IDEAL 4465 OF 6807 4286* BEN NEVIS GERANIUM Q43+95*

A high growth dam who is extra quiet like her mother with a massive deep rib and scale. She is probably the biggest cow in the sale but sailed through the drought and is a very good milker from a fantastic female line that stems back to the great E40. Her joining to Beast Mode will be a ripper.

We purchased L49's sire Johnno J5 for his lovely quality attributes and his doing ability. This has really come through in his daughters who are very easy cows to keep. J49 like all the Johnno's gives you good flexibility in joining decisions as they are literally bomb proof adding their natural thickness and structural integrity to every scenario.

There is a stacking of big, strong cows in this outcross pedigree that gives you so much flexibility. Her joining to Newsflash keeps that tradition going, adding growth and folding in extra carcase. Her dam H100 sells as Lot 50 and she is a maternal sister to Lot 80 – K24 as well as Ben Nevis Merchant M135 who sold for \$11,000 to the Ingham family at Orange in 2017. L56 was a show heifer for our kids and is a sweetie.

L65 has a classic Angus head which follows through to her deep, soft rib and quarter. We are very excited for L65's Beast Mode calf which is the same combination that blew everyone away at our recent bull sale averaging \$13,750. This blend creates extra softness, thickness and doability.

Every now and then you get a special cow that you talk about and refer to for generations to come that shape and defines your breeding program. For us that cow is Jean H215. Her first calf K80 was as big as her by the time she weaned her and while not a big cow herself she packs a hell of a punch. She boasts a uniquely Ben Nevis pedigree and the extra spunk and pride in her carriage and her progeny have the X-factor. In the flesh she is soft, long and thick. She is the dam of Jean K80 who produced the \$32,000 Metamorphic to Banquet, Fernleigh and Twin Oaks (NZ), as well as Ben Nevis Newsflash who sold to Bannaby at our 2018 sale for \$24,000 and our additional Stud Sire Ben Nevis Primus P57 (at stud at merit Farms). She is a prolific bull producer but we fortunately have 6 very special retained daughters. She sells with our highest recommendation. She sells PTIC to Monarch and it will be a ripper.

Jean K80 offers a very rare combination of quality, outcross pedigree and pure power to absolutely light up your breeding program. It's not often you find a big cow with so much dimension that is so soft, with a fine silky coat. K80 is the dam of Metamorphic (who sold to a syndicate including Banquet, Fernleigh and Twin Oaks) whose first 21 calves at auction have averaged over \$15,000. Metamorphic features as join sire in this sale and offers the power and maternal ability of his dam with the reliable carcass of Bartel. She sells PTIC to Paratrooper.

H103 is simply a massive powerhouse of a cow that runs on the smell of an oily rag and gives us a cracker of a calf no matter who we join her to as well as flushing consistently well. She has been our most prolific cow and her progeny consistently rise to the very top. Her daughters in this sale in the previous Lot and Lot 73 – L231 show much promise and she has a long list of high priced and stud sons including BN Larrikin L191 who sold for \$11,000 in 2016, BN Massive M198 for \$13,000 in 2017 to Warrabah Station, BN Nimrod N22 \$10,000 in 2018 to Warrabah Station, BN Nixon N114 to Charlie Williams for \$14,000, BN Nuttella N123 to Robert Skipworth for \$18,000, BN Pinnacle P9 for \$11,000 to the Roots family.

Kiwi K57 was selected as a show heifer for our kids when they were younger to take to the Roundup for her beautiful nature and stylish looks. She is a big capacity cow with plenty of doability, a great head. She has one retained daughter and had an excellent bull for this year's sale.

The natural daughter of our big mumma donor G22 who sells as Lot 112. Her first calf Mainstay M231 sold for \$11,000 in 2017 to The Grace Family at Eulo and we have three treasured daughters retained in the herd. The G22 progeny have really excelled as young cows, they are unique and really give us an edge. K87 is a maternal sister to young donors M191, M192, M201 and maternal brother to \$13,000 Ben Nevis No Fear N34 who sold to Arete Farms in 2018.

Dormist J67 has been an excellent cow for us with the right balance of performance and softness. Her first bull was used by us in-herd for progeny testing with his steer calves performing exceptionally in the feedlot for our steer partners Glen Collin Pastoral Co leading them back to purchase a stud bull P199 last year. Her second calf sold for \$10,000 to Warrabah Station – the astute owners of Judo. We have one retained daughter.

Floryx H3 is one of the easiest doing, most versatile and quietest cows in the herd. She is the maternal sister to our Donor E123 (mother of Lot 54 – G8) as well as our most successful show cow over the years F162. These cows never fail to produce a front pen bull calf. She will produce a thumper to Beast Mode.

Denmist H23 is a big, strong, proud cow who clicks with whoever we join her to. Her first calf K12 sold for \$11,000 in 2015 to the Bulloch family and has bred really well for them since. We are fortunate to have three retained daughters. Most of the other Infinity cows in the sale we joined to Meta to complement their more moderate type, but in this case we used H23's extra power to create something special to Beast Mode.

An absolute thumper of a cow with the constitution and type we have strived for. Her daughter Lot 78 – K17 was short listed as a donor and weaned a cracking bull calf which was the highlight of this year's Autumn drop. She has three retained daughters in all and her calf was purchased this year by Bowenfells Angus for \$16,000 and will be used by us as a stud sire also to join over heifers this year. Special cow.

Lot 53 BEN NEVIS DENMIST H220[#]

HBR 2/8/12 AMFU,CA12%,DD10%,NHFU ID NBNH220 MATING TYPE Natural

VERMILION DATELINE 7078[#] EXAR EXPAND 1241[#] Its not hard to pick Denmist H220 out. She is a really good looking cow with a great Angus head, soft, silky skin and a terrific constitution. She and her calf are geneticals to the lovely Lot 48. This should be a really good match up with Inertia as it retains the Empire cows thickness and power with added carcase.

Ahhh, one of our fav's and features on the back cover. We should have flushed this cow as she is the big capacity dam of Donor Dam J82 whose two sons M226 sold for \$10,000 in 2017 to Point Pastoral and L3 for \$14,000 in 2018 to Warrabah Station. A descendent of the great E40 with all daughters retained and her only bull calf Q238 this year a standout. Her calf at foot by Meta is a knockout.

This process of going through all the cows with a fine tooth comb and analysing their progeny has been amazing for us. We kick ourselves that we didn't flush this cow but have thankfully flushed her daughter and retained her Grandson P242 as our Stud Sire. She has been a prolific bull producer for us.

Another of our hands-down favourite Donor cows. She sold four bulls at an average of \$11,000 and we have four retained daughters who are treasured by us. She is typical Geranium with her fine skin and extra X factor. The power of female genetics is no more evident than in her niece Lot 96- J126.

A very functional and tidy cow that has two retained heifers by us. L12 has a great udder and teat set up in milk and this genetic combination oozes maternal value. The joining with Exclusive will complement it perfectly.

This is one of the very special cows in the sale and she will be very hard to part with. No other cow in our herd has the ability to create the next star like L28 – she throws extra thickness and style every time and has an inherent genetic ability to add a number set that is extremely marketable. Her magnificent Donor dam sells as Lot 59 who is the sister to our highly successful stud sire Eritrea and her maternal brother Next Gen N83 who sold for \$14,000 in 2018 is kicking serious goals at stud duties at Bowenfells Angus in QLD. In 2020 she had the best heifer calf of the drop and arguably one of the best calves we have ever bred. We have yet to tap this cows potential but are very excited to get her Beast Mode embryos on the ground later this year. Maternal sister is Lot 87.

L63 is a deep, soft cow who demonstrates the edge in type and constitution of the Judo's and she is the stunning, natural calf of Donor Lot 95 – J115. We are very excited for her Beast Mode calf which is the same combination that blew everyone away at our recent bull sale averaging \$13,750. L63 is a maternal sister to the \$15,000 Ben Nevis Narwhal who sold to Ollera Station in 2018.

A beautiful cow that combines softness and performance and is right in the pocket for our type. We love her head, her long spine and the softness of her skin and coat. My Dad would have loved this cow. Hindsight is a wonderful thing and with our extra investigation we should have flushed this cow and her dam B77 as we did her sister Lot 98 – J134. The latter is a Donor and dam of the \$28k BN Propagate This is an extremely exciting female line. See her stunning first bull on the web in progeny.

BEN NEVIS JUNE X145[#]
BEN NEVIS JUNE P53+94[#]

Another carbon copy of the last few Stewie cows – he really adds thump and doing ability but in a bigger package. We are so excited for the Beast Mode calf that comes from this joining – it is a no – branier for excellence is phenotype and arithmetic.

The "Genes in the Jean family are very strong" and this could well be the most exciting prospect in the sale. Her dam's maternal sister is none other than our most valued cow H215 and L115 takes those genetics one step further by adding extra thump and depth of rib while maintaining the X factor and proud front end. The volume and dimension of this cow needs to be seen to be believed. While Lot 63 had the best Spring calf in the drop, L115 had the hands-down best female calf and we are delighted to carry on her line with her.

This is a very special young cow who has Donor potential. We love her beautiful head and quality coat and natural thickness and she just oozes style. Jean L231 is a full ET sister to Jean L228 who sells as Lot 22 with her famous Donor dam selling at Lot 23. She will transmit very sexy numbers and thumping calves to go with it.

We adore this Donor Cow. She is the dam of M88 whose first son sold to Young Pastoral for \$14,000 in 2019. As a breed in general we are in danger of losing what our cows are famous for as some carcass lines get shellier and shellier. But not this cow – she is unique. Jean K2 represents everything we are striving to achieve in having the constitution the breed is known for but with added carcass merit under the hide. She is a hoofa in the flesh while maintaining femininity up front. This is a dynamite of a cow and has flushed exceedingly well for us. Her sister N55 has also joined the donor program and dam sells as Lot 105 – H93, we have a stonker of a bull calf by Beast Mode for next years sale and many embryos in utero.

Geranium K10 already has two beautiful daughters retained by us and she is one of six daughters of H168 – all retained by us. So depending on whether you believe in probability or the universe you are nearly bound to get a bull calf by P412 but that's probably why I failed Econometrics at University. She has a beautiful fine skin and coat and is very long and thick quartered.

Dormist K16 is the maternal sister to the \$40,000 Ben Nevis Quantico who sold to Bowmont in our recent bull sale. Her stunning dam sells as Lot 102. She begins this run of three very special cows that are what we call geneticals. The Bartel x Infinity combination has been a gold mine for combining old fashioned quality with modern carcass to target relevant and premium markets. It has given us no less than eight donors in the last three years and K16 has potential donor written all over her. She is a big volume, strong topped, slick skin cow with a beautiful head and neck extension.

You can't help but love this cow with her supermodel front end and all business back end. She has the best Autumn drop bull calf for next years sale with her first bull calf selling for \$11,000 to Ian and Noella Spicer in 2017. Her maternal brother Ben Nevis Quambone recently sold to Bowenfells Angus in Qld for \$16,000 and will be used by us as a Stud Sire also. Again we should have flushed this cow and she has potential donor written all over her. See her absolute thumper of a dam in Lot 45.

BEN NEVIS GERANIUM B77[#]
BEN NEVIS GERANIUM Z46[#]

Super Donor K18 is potent at transmitting excellence into her progeny and is an absolute workhorse in the embryo department. Her \$ Indexes are mind blowing and she transmits this along with an X factor into her progeny with her son Napoleon N214 selling to Sam Pentillo in 2018 for \$18,000 and a second son Ben Nevis Porsche P186 selling in 2019 to Injemira Genetics for stud duties for \$11,000. Her dam Lot 68 is a maternal sister to Lot 98 the dam of the \$28,000 Propagate P37. This is a unique opportunity to tap directly into our breeding program and we can't wait to see how her expectant Paratrooper calf turns out.

Jean K24's granddaughter was the standout of the P heifers and she has two further retained daughters by us. She is a larger framed cow with huge capacity and a feminine front end. She has lovely fine skin and her joining to Prospector P412 should be excellent and unique.

Dormist K59 transmits well above average IMF in her progenys' scans. Her first daughter M115 was the dam of the \$30,000 Ben Nevis Prime who sold to Bannaby in 2019. K59 oozes real quality, she is deep, easy fleshing and very kind in nature. Her joining to Metmorphic will be one of the most anticipated in this sale.

J23's granddam the old B32 cow was legendary here as most of the Crusaders were with ten cracking calves – she never had a bad one. We put this down to constitution and doing ability which comes from the big deep rib, and good head- capable of grazing. Jean J23 has inherited all this and is our type of cow – solid, strong, thick and soft.

We love the combination of femininity and body shape in this lovely cow with plenty of balance through a strong spine combined with depth of rib and flank. These are solid building blocks. The joining to Monarch is designed to build on the softness and depth while injecting more IMF under the hide. The resultant calf will be super docile. Her maternal sister sells as Lot 2.

With a first calf selling as a yearling for \$9,000 this fine coated female was always going to be a work horse. Her second bull calf P31 was heading for a front pen position at the sale until he was injured. The joining to Newsflash should bring extra depth and docility to the power of the Millah Murrah D78's.

Bringing more power and stretch and being a maternal machine is what sets this cows apart from the others. She always punches well above her weight in the calf department. Her son NBNP177 was an absolute standout in our 2019 sale (please look up his photo on Angustech) and her maternal brother Helium H123 held stud duties both here and at Bensons at Top Waterloo, Walcha.

We had always planned to flush Geranium J115's dam but when the daughter came in as stunning as she is in the flesh and after selling her son Ben Nevis Neocent for \$15,000 in 2018 to Dennis Heywood we fast tracked her to the Donor Program. She is hugely maternal with a wealth of carcase under the skin and blends beautifully with bulls like Exclusive and Beast Mode. She has recently been flushed and we exposed her once to Monarch post flush so that she will either sell PTIC at five weeks or NDP ready to be joined your way after the sale. Please check the supp sheet for details. Her dam sells as Lot 58.

A big framed, feminine, super productive cow who has a distinguished track record with us. On her score card she had the best L heifer in 2015, the best Autumn drop N heifer N61 in 2017 and then she produced the cracking Propagate P37 who sold to Merit Farms last year for \$28,000 and features as a joining sire here. A descendent of the great E40 she is a maternal sister to Lot 68 – L84 and is the maternal aunt to the fabulous Lot 79 – K18. Her maternal brother Ben Nevis Mozart sold for \$13,000 in 2017 to Ian and Noella Spicer. She suffered an injury to her hip during flushing this year. She is fully weight bearing and functional.

We have really amped up our ET program to enable us to have female sales every three years. Given we know the genetic lines so well we selected three of the top heifers from our most exciting lines to flush this year and J148's daughter P182 was our first choice. J148 was Lot 117 – G115's only heifer calf with the rest being bulls. These are descendants of the great Geranium E40 a pathway which leads to a significant number of our dominant cow lines today. Her joining to Paratrooper is hotly anticipated.

Again another descendant of the great Geranium E40 H6 is a massive, big, strong cow with tremendous type and constitution. Her strength and power of head and jaw was displayed in her bull calf Mystic M97 that sold to Quarterway Angus in 2017 for \$16,000. She is a beautifully quiet natured cow.

In hindsight we wish we had pinned our ears back and used BN Frontrow more. Like Lot 14 H215, H10 displays a rare combination of softness, quality, and thickness and is eternally youthful. We just love her. Her first daughter K3 was the highest ever scanning animal on Ben Nevis going off the scanner – she went on to become a very successful Donor selling two bulls into studs Magnum M41 to Pine Creek for \$16,000 in 2017 and National N120 to Nampara Angus for \$14,000 in 2018. Her sons have always made the front pen.

The powerful and proud dam of our highest ever selling bull Ben Nevis Quantico who sold this year for \$40,000 to Sam King and family at Bowmont. Quantico's rare combination of thickness, softness and style with a generous splash of X factor comes from his beautiful dam. Her daughter Lot 77 – K16 stunning and successful in her own right. It goes without saying that we should have flushed both these cows and while we thought we knew our cow herd in and out the process of doing this cow sale has taught us so much more about the power of pedigrees. Our only consolation is that her other daughter P23 is with us still and has the best calf among the Autumn Heifer contemporary. H26 is slightly lame at the time of printing but we expect her to make a full recovery by sale.

THANK YOU

Organising and strategising this Cow Sale has been a massive job and we would sincerely like to thank the following people whose advice and friendship we value greatly. Ben Simpson, Paul Dooley, Cherry Steel, Stu Hobbs, Kylie Steel, Ross Thompson, plus the boys from Nutrien Boulton's – Miles Archdale and Mat Larkings.

For making the catalogue happen and keeping me sane, a big thank you to Megan Scrivener – our talented, logical, creative and funny graphic designer. Then finally thank you to our awesome stationhand Hamish Worthing for all his hard work.

The dam of our exciting donor Lot 79 – K18 whose progeny have averaged \$15,000. It is clear that the power K18 transmits comes directly from her dam but that she does this without sacrificing her fine quality skin and coat – a unique valuable asset. Her maternal sister is none other than our other superstar Donor Lot 98 – J134 who was the dam of the \$28,000 Propagate P37 that sold to Merit Farms in 2019 as well as Lot 68 – L84. Again the power of these female lines is evident and her joining allows you to tap directly into the cutting edge of our breeding program.

Speaking of the power of female lines and along comes a very special cow whose only two daughters made their way straight to our Donor Pen. One of these, Jean K2 may well be the star of this sale and sells as Lot 75. We have had so much success keeping the Ben Nevis component in our lines strong which gives us our unique edge but special bulls like Empire have only added to that uniqueness. H93 is just the type of cow we strive to produce, feminine and yet solid and strong enough to hold her own in harsh times and produce powerful bulls.

Another straight line to the famous E40 she has had such a positive influence on our breeding program. H169 is a big, upstanding matron with a strong spine and gentle disposition. Her daughters have all been retained in the herd and her son Ben Nevis Machine sold to long term clients of 50+ years Peter Lockyer for \$11,000 in 2017. H169's dam was a terrific and old favourite cow here and H169 has 2 maternal sisters in the sale in Lot 41 – J145 and Lot 13 – L83.

H200's dam E123 has had a distinguished career with us, and even though they only had two daughters in that time H200 and Lot 54 G8, her bull calves never failed to make the top pen. Now that she has gone both daughters have followed in her tradition with both H200 and G8's bull calves making the top pen this year with H200's Lot 4 selling for \$15,000 to the Stackman family at Walcha and G8's selling for \$12,000 to Andrew Carruthers at Armidale. H200 is a long framed, high milking cow with a superb disposition. She play well with any sire but her joining to Monarch should be a treat.

G4's dam was purchased in partnership with our good friends at Longford in support of Angus Youth. Usually Ben Nevis is a closed herd but we make exceptions for the great Wilcoola cows that originally stem from Ardrossan. G-Force as we have nicknamed her has been a tremendous asset to us providing us with Donor L31 who is an absolute stunning feature cow in Lot 4. In her own right she produced a stud sire currently at work at Banquet at our 2019 sale. She has plenty of potential yet as a donor providing an outcross pedigree and great performance across the board in a powerful package. Pictured on page 60.

We are coming to the end run of Infinity cows now and if you don't already have one yet now is your chance. There simply has not been a more reliable and valuable sire line than these in the last ten years. The reason for this, and it shows in G12 is their combination of fleshing ability and carcass attributes. On top of this they add a flexibility to any joining and will produce a good calf, year on year, for years to come as they are known for their longevity. Case in point the joining of her to Metamorphic mimics out successful Bertel X Infinity combination from five years ago but on turbo-adding an X factor of quality as well. Beautiful cow and very quiet.

When we select donors we take note of their cow family as well as their performance in their contemporary when all are treated the same. Both G22 and her dam blitzed their respective peer group for growth and IMF and G22 has gone on to be one of our most successful Donors. She is all the beautiful quality attributes of Infinity but with extra thump. She has one daughter already follow her to the ET program with Grandson P130 featuring as a Stud Sire here. Her son Ben Nevis No Fear made \$15,000 at our 2018 sale to Rod Craney but she has mainly left us with beautiful daughters in the M's and N's as her legacy to us.

Another complete character and possibly the quietest cow in the sale. Introducing the dam of Monarch M128, our much treasured stud sire. As you can see she runs on the smell of an oily rag which, along with her marbling was one of the key reasons we selected Monarch for stud duties. Both G76 and Monarch were the highest IMF scanners in their contemporaries. He has been the best Stud Sire we have used since Xerox and we look forward to many more years of his progeny. This joining will make us very jealous indeed. We expect it to be a stonker. Pictured on page 60.

Lot 117 BEN NEVIS GERANIUM G115#

HBR 28/8/11 AMFU,CAFU,DDFU,NH3% ID NBNG115 MATING TYPE AI

B/R NEW DESIGN 036#	S A F FOCUS OF E R#	The last Infinity cow in the sale and we will be so sad to see them go. This is, like all the Infinity's a big ribbed and roomy cow with her quality evident in the soft, silky skin. She is beautifully kind. These traits will only be exacerbated in the joining to Monarch. It will be pure quality. Her granddaughter P182 is our youngest Donor selected ever and her daughter J148 sells as Lot 99.

JOIN SIRES

BEN NEVIS METAMORPHIC

Metamorphic was the high selling \$32,000 bull from our 2017 sale selling to syndicate including Banquet, Fernleigh and Twin Oaks. His dam is Lot 15 – K80, his grand dam is Lot 14 – H215 and he is the maternal brother to the \$24,000 Newsflash. His thumping dam Jean K80 is Jean H215's daughter she is a maternal sister to the \$24,000 Ben Nevis Newsflash. We specifically chose Meta over the Infinity females to produce an exciting offspring that has a high head carriage with a ton of muscle and the softness. They will be very special.

PARATROOPER

Paratrooper was reserved for some of our special donors to blend in his unique length and expression of natural thickness, softness and style. This is a top-shelf joining.

NEWSFLASH

A very special bull for us from our favourite Donor Jean H215 he combines her traditional quality with Proceeds carcase and is docile, thick, an outcross and an ultimate spunk. Purchased by Bannaby Angus for \$28,000 in 2018 and available through Jack Laurie at Breeder Genetics.

BEAST MODE

Beast Mode has the carcase quality of his sire with the depth, softness and thump of his famous dam. Highly functional and suitable to Australian conditions his progeny are consistently excellent. On top of function and form they have the extra quality and style we love. His calves are always consistently exciting and he is always in short supply and high demand.

BEN NEVIS MONARCH

A simply beautiful bull who displays what we have been working towards in good old fashioned quality with a wealth of carcase under the hide. A real gentleman and breeding the house down with soft, deep kind daughters and sons. Easy doing, slick coated and thick with excellent feet.

MUSGRAVE EXCLUSIVE

It is the combination of skin, softness and pure mass that drew us to Exclusive and the surety of the programme he comes from.

FIREBALL

A bull to inject extra IMF and softness that is backed by an excellent cow family. Good skin and bone, and the rein we like in all our cattle.

BEN NEVIS PROPOGATE P37

The \$28,000 second top seller at our 2019 sale, offering a unique combination of power and softness being the highest IMF, biggest EMA and fattest bull in his large contemporary. A very showy bull, his first calves here and at Merit Farms are knockouts. His Donor Dam sells as Lot 98.

BEN NEVIS PODIUM P242

Combines Lionhearts thickness and style in a calving ease package. His dam sells as Lot 39.

BEN NEVIS PROSPECTOR P412

Combines a unique, high performance bloodline in a big volume, deep-bodied package with a terrific sire's head. His spectacular Donor Dam sells as Lot 4.

MUSGRAVE EXCLUSIVE

FIREBALL

INSPIRING SIRES

When I first started making breeding decisions 35 years ago Dad let me have my way a bit and I disastrously used about 20 sires for every 30 cows. To this day I can hear his advice to just use a few sires and to breed them in large consistent lines appropriate to that particular cow family. Here are the top sires that have had a profound bearing on the females in this sale.

BEN NEVIS XEROX (ROXY)

Simply the best bull from the best cow and as I once boasted possibly the best bull in the universe. Kind, deep ribbed, slick coated and strong spined with a good head. We think he is still ... possibly ... the best bull in the universe.

TE MANIA INFINITY

We wanted to prove that Roxy was the best bull in the universe and set him head to head with what we thought was the then overrated Te Mania Infinity. We set out to hate him and like a reformed smoker we soon became zealots. The Infinity females typify the perfect Angus cow. They are easy doing with good constitution, a kind nature and a soft slick skin that hides a wealth of carcase. They are a stunning cow line.

AYRVALE BARTEL

Again a bull we set out to hate and used as a benchmark sire to improve accuracy within our herd and to boost our IMF bottom line. Of course we ended up really admiring this bull. He worked beautifully in a complementary fashion with the Infinity daughters adding carcase beneath the hide and maintaining the constitution and structure. The Bartels daughters are deeply maternal and make magnificent mothers.

REMITALL RACHIS

Rachis was the most exciting bull we used in the last decade and was discovered by Chris Knox and Helen Alexander (whose cattle breeding skills are among the best in the business in our minds). Rachis added more depth and softness to the Bartel x Infinity line and gave us a series of high selling bulls over three years producing our next Cow Making Sire – Ben Nevis Judo.

BEN NEVIS ERITREA E6

Our philosophy on good bulls is that they must have a super cow behind them. Eritrea's dam is the foundation for no less than three Donors in our current program, and Eritrea is the Sire of super cow Jean K80. They are highly productive females with long necks and big bodies. They are very high milking.

BEN NEVIS FRONTROW

Named for good reason he bred daughters with enormous capacity and constitution. His daughters are earlier maturing, square and with a good fine skin and doing ability. He is the sire of the irreplaceable Jean H215.

RAFF EMPIRE

Empire sires big volume daughters with silky skins. He has always been a favourite of ours and comes from an excellent program and cow line.

CHERYLTON STEWIE

Stewie throws a ton of performance and capacity whose daughters are displaying good longevity.

POSS TOTAL IMPACT

Chosen for his fine skin, outlook and ability to breed functional females.

USING EBV PERCENTILES

Selecting the right cow for your business needs to be as easy as possible.

So we have incorporated percentiles into our catalogue as an extra tool to help you.

A percentile value allows you to see where an animal sits in the breed for each trait. This gives you more information than an EBV figure alone. For example, if an animal sits in the 30th percentile for IMF it means it is in the top 30% of the breed. But, if an animal sits in the 80th percentile it means that 80% of animals are better than it. Generally the lower the percentile figure the better, except in the case of some traits where moderation or balance is preferred like Mature Cow Weight and Scrotal Size (can be too big), or BW (too small and frail at birth).

The 600 day weight of this cow sits in the 80th percentile, meaning 80% of animals are better than him for the trait.

BEN NEVIS JEAN					
	600	EMA	RIB	RMP	IMF
EBV	90	4.5	2.3	2.3	2.1
PERC	80%	55%	5%	5%	30%

The IMF of this cow sits in the 30th percentile, meaning he sits in the top 30% of the breed for this trait.

Information on Percentiles courtesy of Trio Angus.

Important notices for purchasers

ATTENTION BUYER

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

ATTENTION BUYER – Embryo Expected Average Progeny Values

Expected average progeny values are provided to assist breeders estimate the outcome of particular mating combinations. The actual TransTasman Angus Cattle Evaluation EBVs for any progeny resulting from a particular mating are likely to vary from the expected average values.

PRIVACY INFORMATION

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances.

If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete a form which will be available when registering to bid on the day and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

UNDERSTANDING THE TRANSTASMAN ANGUS CATTLE EVALUATION

WHAT IS THE TRANSTASMAN ANGUS CATTLE EVALUATION?

The TransTasman Angus Cattle Evaluation (TACE) is the genetic evaluation program adopted by Angus Australia for Angus and Angus infused beef cattle. TACE uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (eg. weight, carcase, fertility).

TACE includes pedigree, performance and genomic information from the Angus Australia and New Zealand Angus Association databases to evaluate the genetics of animals across Australia and New Zealand.

TACE analyses are conducted by the Agricultural Business Research Institute (ABRI), using beef genetic evaluation software developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

WHAT IS AN EBV? An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (ie. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

USING EBVS TO COMPARE THE GENETICS OF TWO ANIMALS:

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (eg. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40kg (ie. 20kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400kg carcase than a bull with a IMF EBV of +1.0 (ie. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

USING EBVS TO BENCHMARK AN ANIMAL'S GENETICS:

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus/Angus infused animals in Australia and New Zealand.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes.

For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

CONSIDERING ACCURACY: An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50 – 74% as of medium accuracy, 75 – 90% of medium to high accuracy, and 90% or greater as high accuracy.

DESCRIPTION OF TACE EBVS: EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this catalogue is available at www.angusaustralia.com.au.

LOW STRESS STOCK HANDLING

We often get asked why our cattle are so good to work with and we have determined it's a major reason people buy our bulls, steers and replacement heifers.

While temperament is a big ticket factor for us genetically (especially after dad's near death experience in 1999), we also recognise the Importance of working stock differently with methods taught to us by Chook Kealey and Bud Williams.

Chooks ability to get our animals through the high stress situation of a sale ring is legendary. He explains that when you work animals and understand their four instincts

and seven principles you get a different outcome's to just working cattle quietly which is what most people mistakenly believe is low stress stock handling.

Chook has taught us so much and he is available to run schools on farm for other stud breeders with him recently working with Te Mania and Ascot Studs. It makes a huge difference.

HOW TO REGISTER with ELITE LIVESTOCK AUCTIONS

Welcome to the new age of selling livestock in Australia and "Happy Bidding"

- 1  Simply go to **www.elitelivestockauctions.com.au** using your desktop, laptop, iPad, iPhone or android device
- 2  Click on the **"Sign Up"** page / link
- 3  Create a bidding profile using the bidder registration page.
(You can either register as a livestock agent, company or private buyer.)
- 4  Agree to the Elite Livestock Auctions Terms & Conditions and the Selling Agents Sale Terms & Conditions as printed in the official Sale Catalogue
- 5  Click **"Register"**
- 6  You will then be notified by email that an account has been created

- 7  Once an account has been created you are all **"Set to Bid"**
- 8  Each auction can then be viewed by clicking **"Live Auction"** logo on the Elite Livestock Auctions website
- 9  Once you receive email notification that your account has been created please go to the sale you wish to bid at and click **"Request to Bid"**
- 10  The sale agents will then approve your application to bid and on the sale catalogue you will see **"✓ Bid Request Approved"**
- 11  On Sale day simply login, click **"Enter Auction"** on the catalogue page and you can start bidding.
(There is no need for software download)
- 12  At the completion of the auction, invoicing will be carried out as per your registration details by the Selling Agents.
