BLOODED AND 3-DAY

ALL BULLS HAVE BEEN BLOODED FOR QUEENSLAND

WELCOME

Walcha Tourism has a sense of humour when it calls our winters 'bracing' but for the record we are classed as the coldest town in Australia with the most days annually under -15° , -10° and -5° . We are comfortable with our cow factory doing it tougher in the hills of Walcha but for the yearling bulls we needed them to grow big, strong and ready for work. As a result, we decided to winter them in Attunga, a close but warmer climate designed to help them achieve their genetic potential. Considering this year's season and the lack of grass at Walcha, this plan slotted into place extremely well.

This new property at Attunga, 'Hazelwood', is now our Bull Centre. It was run very down but had good bones with river flats, irrigation and most importantly a house on the hill. We partner in the land with my niece Bonnie and her partner Will, and they now manage the bulls and country on our behalf.

We have never even owned a sprinkler system in our garden, so this has been an enormous but rewarding learning curve. Will is ex-army and has great practical sense and pure grit, which is now focused on the irrigation system that had stood idle for six years. With Bonnie and Jacko's help they have turned it into a dream little block, sowing pastures and crop for the bulls, fixing fences and putting in infrastructure as we go.

Most importantly the bulls have never been so healthy, running on mixed multispecies and wheat they are absolutely thriving and ready to work. It's also got the big thumbs up from all our contractors who will no longer have great stories to swap comparing their most memorable days in sleet and gale force winds at Walcha while bull testing, freeze branding or inspecting ... (you're welcome guys).

We warmly welcome you to our 2026 sale.

Stu and Hap Halliday and family

THIS YEAR'S BULLS

QUALITY. DOCILITY. INTEGRITY.

MANAGEMENT

We take great pride in our reputation for quiet cattle. The bulls have been handled with bikes, dogs, horses and on foot. Under normal circumstances they are of sound temperament and we ask that you treat them with kindness and respect, especially under the pressures of sale day.

HEALTH

The bulls are ready for immediate use and we recommend using a 12 – 14 mo yearling at a rate of 1 bull to 35, and a 16 – 18 mo bull at usual rates of 1 to 50. All bulls have been tested PI (pestivirus) negative and vaccinated with 7-in-1 (Lepto), Pestiguard and Vibriosis. They have had regular doses of Vitamin A,D,E, Vitamin B12 and drenched with Flukasole C and Eprinex Pour-on on 15 July 2026.

BLOODING AND 3 DAY

All bulls have been blooded for Queensland on 26 May 2026 and vaccinated for 3 day on 5 August 2026. A booster vaccination will be given to those in affected areas the day after the sale.

FERTILITY

FERTILITY POLICY YEARLING BULLS: developed in conjunction with Chris Hallet BVSt MCSt and Millah Murrah, written by Ross Thomson.

We have led the way with yearling bulls and believe vehemently their use is key to increased farm gate profitability. We have adopted this policy with reference to two other who share similar views, Millah Murrah's Ross Thompson and Chris Hallett of Coolah Vet Clinic."

Bulls are vet checked by Chris Hallett of Coolah Vet Clinic, including penis examination, palpation of reproductive organs and visual inspection of structure and locomotion.

At the same time, a crush side test for semen motility is conducted. A semen sample is then sent to the Queensland Sperm Morphology Laboratory for analysis.

All bulls in the 18 month and two-year categories have presented greater than 70% normal sperm, except when noted on the supplementary information sheet, provided on sale day.

For the yearlings, the satisfactory morphology threshold is lowered, simply due to maturity. Yearling bulls presenting 50-70% normal sperm, and showing adequate rates of improvement from multiple tests, will be included in the sale with their % normal sperm indicated on the supplementary sheet. It is important to note that they are considered ready for work at point of sale.

As in previous years, there will be some yearlings for whom it is not possible to obtain a satisfactory semen sample ahead of the sale. While it is unlikely that they are infertile, we prefer to be sure, before delivering them to their new home. And rather than withdraw them from sale, we sell them with the following options available to the purchaser:

1. Free delivery guaranteed by 20 October, pending a satisfactory semen test result, with no payment due until this time or,
2. In the event the bull fails the retest, the buyer may,
 - a. withdraw from the sale altogether,
 - b. retain the option to purchase the bull pending a satisfactory result at an agreed future date, or
 - c. elect to take a satisfactory replacement, delivered free of charge by 20 October, with price negotiated privately, no higher than the auction price of the original bull.

The sale supplementary sheet will clearly identify any bulls presented for sale under these delayed terms.

COMMENT: Some studs do not conduct any form of semen testing, and many do not carry out morphology analyses, even for two-year-old sale bulls. Morphology analysis of genuine yearling bulls is rare. Semen testing is a vexed area, and we make no judgement on what another stud does in that regard. The reason some studs, including Millah Murrah and Ben Nevis, choose to undertake semen morphology testing is that, very occasionally, it will identify a permanent issue that cannot be found by a thorough vet examination or crush side testing.

It is important to understand that semen testing is not a "silver bullet" guarantee of the long-term fertility or infertility of a bull. It is no more than a "point in time" examination. Testing six weeks apart, invariably reveals failed bulls that pass and passed bulls that fail.

Above all, during mating season, be sure to check the bulls properly each week at least. And in single sire situations, always endeavor to rotate the bulls between mobs midway through the season.

SEMEN RIGHTS

We retain the right to collect up to 600 straws of semen from bulls nominated in the catalogue with our elite logo for in herd use only, OR for our own commercial progeny tests. Ben Nevis will collect semen at the vendors expense and the purchasers convenience. Where possible this semen will be collected pre-sale.

WARRANTY

The vendor warrants that;

Bulls are fertile and capable of natural service within six months of the date of sale to the purchaser (Warranty period).

The vendor will either:

1. Provide a satisfactory replacement; or
2. Provide a credit for us at the next Ben Nevis Bull Sale equal to the purchase price (excluding any costs and expenses of the purchaser in taking delivery), minus the salvage value.

Where:

1. The purchaser claims a bull is infertile, upon purchaser submitting two x veterinary reports ten weeks apart stating the bull is infertile (semen) OR one x Veterinary Report stating the bull is incapable of natural service, and a Statutory Declaration by the purchaser to the effect that the substance of the report is true and correct. The Veterinarian must state that in their opinion there is no evidence that the bull has suffered any injury or illness (or infection) during the Warranty Period which could have affected his breeding ability. The Veterinary Report and the Statutory Declaration must be forwarded to the vendor within 14 days of the Warranty Period expiring.

BULL HANDLING

On arrival at their new home it is important a suitable mob of animals is yarded to greet the bull to minimise stress. Suitable animals include pregnant cows, steers but certainly not other bulls.

The bulls are in good working condition at the point of Sale, but it is imperative to ensure good nutrition for the bull during the joining period.

You should check bulls regularly to see that they are working, especially in the early stages when most problems occur and early intervention can minimise damage to the bull and conception rates. After joining, bulls should be drenched and placed on good pasture to get back in condition.

SALE INFORMATION

SALE DATE AND INSPECTION TIME

Annual Ben Nevis Angus Sale – Wednesday 9 September 2026.
Undercover shelter is provided.

10.00am – Inspection

Bulls may be inspected from 10.00am on the morning of the Sale, or at any other time by arrangement with the agents or vendors.

1.00pm – Ben Nevis Angus Yearling Bull Sale

100 Angus bulls. System will be live auction on site interfaced with Stocklive. See details at www.Stocklive.com.au.

SELLING SYSTEM

Sale of the bulls will be conducted under normal auction conditions on-farm. Online sale of the bulls will be conducted by AuctionsPlus and Stocklive with live bidding (NOT Helmsman). Please check with the Selling Agents to obtain a buyer's number if you are considering making a purchase. Successful purchasers are requested to give written advice to the Selling Agents regarding transport arrangements at the conclusion of the Sale.

TRAVEL, ACCOMMODATION AND DINING

There are two Hotels and two Motels in Walcha and we are just an hour's drive from Armidale and 1 ¼ hour's drive from Tamworth.

Both of these regional centres have Airports, car hire, extensive accommodation and restaurants.

TRANSPORT

Transport will be provided free of charge to major centres on route in QLD, NSW, VIC and the ACT. All transport will be coordinated by Lockie Falls Transport, please call him on 0429 826 342.

Even if you have transport of your own please liaise with Lockie to ensure the smooth running of your bull delivery. Buyers instruction slips must be completed post sale with transport instructions in writing, and a first name and phone number please. It just makes life so much easier for us – thanks.

REBATE

2% rebate to outside Agents registering BULL BUYERS, in writing, '24 hours' PRIOR to the Sale and settling on their behalf within seven days of the date of Invoice.

CATERING

We invite you to enjoy a free lunch and morning tea on us including steak and sausage sandwiches, tea, coffee, cold drinks and cakes and slices. A big thank you to the Lions Club and hostesses with the mostesses Cherry Cheer, Jenny Hoy and Colleen Green.

INSURANCE

Bulls are like any other piece of valuable farm equipment and it's wise to insure them, especially for the first six months of their working life. There are a number of options available through CGU and WFI at the Sale venue.

REGISTRATION

Ownership transfer of bulls will be registered by the vendors with Angus Australia, provided accurate transfer details are supplied with the Buyer's Instruction form.

GST

All animals are sold excluding GST.

RECESSIVE GENETIC CONDITIONS

All bulls over a 10% risk of being a CA, NH, AM or DD carriers have been tested with published results in the Lot information. We do not consider these to be significant commercial issues, but clients wishing any further information are welcome to contact us at any time.

WHAT IS A GENETICAL

A genetical is the same Sire x Maternal Grandsire so they share 75% or more of the same genetics.

We do this to create consistency in our cow herd and to breed large lines of bulls that are similarly bred either for multiple joining situations, or to give people more options. We refer to geneticals in the lot comments section.

VISITOR HEALTH AND SAFETY ADVICE

All the sale bulls have been screened for temperament and are quiet to handle under normal circumstances; however there are inherent risks associated with cattle handling.

VISITORS ENTER THE CATTLE PENS AT THEIR OWN RISK.
CHILDREN MUST NOT ENTER THE YARDS.

People entering the yards are at risk of injury. Be especially alert for bulls fighting. We do not expect the bulls to be aggressive with humans, but Sale Day places extraordinary pressure on them. Remember, even the quietest bull is in fact an unpredictable animal.

Do not crowd the bulls or loiter inside the pens. We cannot cover every example of the dangers of cattle handling so please use common sense and be alert at all times. Please call on any of the Landmark Agents for an escort through the bulls if required.

All persons who attend the sale do so at their own risk and the vendor assumes no liability, legal or otherwise, for any accidents which may occur.

Disclaimer

Every effort and all reasonable care has been taken by the vendor to ensure that the information provided in this catalogue is correct at the time of printing. However, neither the vendor or selling agents take responsibility in regards to the accuracy, reliability or completeness of the information provided, and do not assume any responsibility for the use or interpretation of this information. You are encouraged to seek independent verification of any information contained in this catalogue.

Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, neither the vendor, Angus Australia or the selling agents assume any responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

HOW TO GET TO THE SALE

645 Brackendale Road, Walcha

From Walcha take the Oxley Highway and head east towards Port Macquarie. Approximately 4kms out of Walcha turn right onto the Brackendale Road. The Mingary woolshed and yards are approximately 6kms along the Brackendale Road on the left hand side, and will be well sign posted on sale day!

THE IMPORTANCE OF TYPE

While we are utilising the latest BREEDPLAN and Genomics technologies to enhance the value of our beef under the hide you will often hear us talk about type.

Before the advent of genetic evaluation, type was the main determinant (along with breed) to identify eating quality. These traits, while highly heritable, are subjective but they are a particularly important feature of our brand and give us an important edge in quality that we take great pride in. We believe type is just as important today as it was then to balance our breeding approach and ensure we do not lose those 'hard to measure' traits for which the Angus breed is famous. These include constitution, doing ability, structure and balance.

HEAD AND MUZZLE

The perfect Angus head should be broad with good hooding to protect the eye and have a wide jaw and strong muzzle. The width of their jaw will be reflected in the width of their whole body structure which is especially important through the hips and pins for calving ease. As Bruce Steel used to say 'the difference between a narrow and wide muzzle is like the difference between eating with a shovel or a teaspoon'.

GOOD REIN

This is one of our main physical selection traits. An animal with good type will have a naturally uplifted head and there is no better single measure of structure. A lifted head and long neck reflects a shoulder angle that will allow for calving ease and natural movement thus allowing longevity.

STRONG SPINE

In all our sires we chase a strong spine coupled with a proportionately longer hip to pin ratio to fortify strength of spine and strength of loin. The most valuable cuts are along the spine and we want them to have the least work to stay tender and be supported. We have been extremely disappointed in the recent influx of swampy backed bulls, with short hip-pin and high tail set that seem popular in the States.

HIP TO PIN

This is a key indicator for structural correctness. Animals should be proportionally longer from hip to pin and have a slight downward slope to facilitate calving ease. This reinforces the strength of the overall top line and gives the animal more balance. Too much slope is reflected by sickled hocks, low pasterns, and long feet while a shorter hip to pin combined with the pins being higher than the hip leads to even more debilitating conditions. These include a shallower, weaker loin with more pressure on the spine leading to smaller EMA and breakdown, straighter angles through the hocks and pasterns leading to injury and arthritis.

TAIL SET

Who cares? We do. After Stu working 15 years in the Dairy Industry as a vet, it became very obvious that the cows with their tail sets higher and more up their back were more prone to uterine infection as they were continually defecating into their vulva. On top of this, it comes hand-in-hand with a short hip to pin and swampy back and is found in harder doing animals.

SKIN

You will often hear us talk about skin and it is one of the highest-ranking physical selection criteria we employ. We have measured and selected for it for years. Skin is an old timer's indicator for beef quality and tenderness and is measured by us in two forms, with the finer the skin and the softer/finer the hair correlating highly with scanned IMF. Animals with the better skin types are also those that clean up and re-breed faster coming into Spring joining. Angus Australia is currently researching skin type and its implications. In the same way, extra skin along the throat indicates easy doing animals.

DEPTH OF BODY

We chase a good deep rib and body as an indicator of a cow's constitution. These cows perform better for us during our harsh annual winters and droughts. As my Dad would explain they have a bigger vat and so can ruminate more efficiently.

CLEAN SEATS TO THEIR PANTS

You will often hear us talking about a bull having a clean seat to his pants. On bulls and females, long or course hairs anywhere under the udder/scrotum area, up through the escutcheon or flicking along the outer thighs indicate poor doers. The udder and the seat of their pants must be clean with wider spades (the hair going in the opposite direction) either side of the tail to result in better doing ability and easier milking.

FLANK

A deep flank (preferably one deeper than their girth) that ties deeper into the animal's quarter is an indicator of doing ability and allows for a greater volume of muscle and weight in the hindquarter and stifle area.

BONE

We prefer a flatter bone as an indicator of efficiency and tenderness. These are animals that do better on grass without the benefit of a grain diet. Rounder boned animals such as European breeds are higher yielding but have lower meat quality and are harder to fatten.

FEET

Not too big or too small with a claw and set score between 5 and 6 and an appropriate depth of heel to aid in even wearing. We applaud Angus Australia's recent developments to simplify these scores and integrate the use of genomics. There have been many unsuitable bulls allowed into the country in the last 10-15 years and this is something we are committed to getting right and we score and cull our animals annually for feet.

MUSCLE

We go for volume of muscle consistent with an Angus type and avoid very heavily expressed muscle types as they are generally harder doers and tougher to eat. Volume of muscle comes with width and length but can be complemented with overall softness.

TEMPERAMENT

This is our single most important selection criteria where we have no room for compromise. Quieter cattle not only make life safer and more enjoyable but they have been proven better doers with better meat quality. The feedback we get from our clients regarding the good temperament of our cattle is something we are most proud of. Life is too short to deal with cranky cattle.

Tail Set

Higher/up the back – more prone to uterine infections in females

Hip to Pin

A key indicator for structural correctness

Strong Spine

The most valuable cuts are along the spine

Good Rein

An animal with good structure will have a naturally uplifted head

Bow Tie

Essential accessory to woo the ladies

**Depth of Body**

Good, deep, rib and body are an indicator of an animal's constitution

Flank

An indicator of doing ability

Skin

An old timer's indicator for beef quality and tenderness

Head and Muzzle

Broad, good hooding to protect the eye, wide jaw and strong muzzle

LOT 28. BEN NEVIS WRANGLER W328^{PV}

HOW TO CHOOSE WHICH EBVS MATTER FOR YOU

There are so many traits now it is impossible to improve on all of them and you should prioritise which traits matter most to your business and that's different for everyone.

As bull breeders we target the premium markets on behalf of our clients so the Japanese B3 and Branded Beef Markets domestically. We balance that against the needs of a cow calf producer so overlay calving ease traits and growth. We also want them to enjoy their cattle as much as we do so temperament matters. We utilise the EBV's here as a tool, but common sense must prevail.

DO YOU WANT EASIER DOING COWS?

One of the newer traits we feel is important to include in the catalogue is Mature Body Condition (MBC). We feel it's a trait that holds universal appeal to help find those easier doing animals that hold their body condition better as adults and through tough times. It can be confusing having a P8 Fat EBV and a Mature Body Condition especially when they don't seem to be correlated?

In simple terms P8 fat describes fat as they are growing while MBC describes differences in fat as mature animals. We all know those people who were skinny as teenagers but then might have a weight problem later in life even though they don't seem to over-eat. Well cattle are the same.

The processor doesn't want P8 and Rib Fat over and above the market specs and yet as producers we want easy doing cows that carry condition? Surely we can't have both? Or can we? P8/Rib Fat and MBC are only moderately genetically correlated. This means we can select animals that put more of their energy into growing muscle and bone than fat at an earlier age but then mature into an easier keeping animal for life.

We have put the P8 Fat and the MBC EBVs in our TACE EBVs so you can look at both and find what suits you best.

Please call for more information.

ANGUS BREEDPLAN EBVS AND PERCENTILES

AUGUST 2026 TRANS TASMAN ANGUS CATTLE EVALUATION

Average EBVs from all 2024 drop calves

BREED AVERAGES EBVS																	STRUCT.		INDEXES	
CED	CEM	BW	200	400	600	MCW	MBC	MILK	SS	DTC	CWT	EMA	RIB	P8	RBV	IMF	CLW	ANG	ABI	ABL
2.4	3.1	3.8	52	94	121	102	0.30	18	2.3	5.1	69	6.9	0.1	-0.2	0.4	2.6	0.83	0.97	211	360

USING EBV PERCENTILES

Selecting the right bull for your business needs to be as easy as possible. So we have incorporated percentiles into our catalogue as an extra tool to help you.

A percentile value allows you to see where an animal sits in the breed for each trait. This gives you more information than an EBV figure alone. For example, if an animal sits in the 30th percentile for IMF it means it is in the top 30% of the breed. But, if an animal sits in the 80th percentile it means that 80% of animals are better than it. Generally the lower the percentile figure the better, except in the case of some traits where moderation or balance is preferred like Mature Cow Weight and Scrotal Size (can be too big), or BW (too small and frail at birth).

BEN NEVIS KEVIN					
	600	EMA	RIB	RMP	IMF
EBV	90	4.5	2.3	2.3	2.1
PERC	80%	55%	5%	5%	30%

The 600 day weight of this bull sits in the 80th percentile, meaning 80% of animals are better than him for the trait.

The IMF of this bull sits in the 30th percentile, meaning he sits in the top 30% of the breed for this trait.

Information on Percentiles courtesy of Trio Angus.

For more information on BREEDPLAN and how to use it go to:

www.angusaustralia.com.au/tace/understanding-angus-tace/understanding-ebvs/

DISCLAIMER AND PRIVACY INFORMATION

Important notices for purchasers

ATTENTION BUYER: Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

PRIVACY INFORMATION: In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete a 'Buyers Option to Opt Out of Disclosing Personal Information to Angus Australia' form and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

PARENT VERIFICATION SUFFIXES

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

- PV** both parents have been verified by DNA.
- SV** the sire has been verified by DNA.
- DV** the dam has been verified by DNA.
- #** DNA verification has not been conducted.
- E** DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

TACE

LOT SUMMARY INFORMATION

CONTEMPORARY GROUP

The two summaries for both 18 month old in blue and 12 month bulls in green are different contemporary groups and their scan data was taken on different dates and they were raised under different conditions – they should not be compared as such.

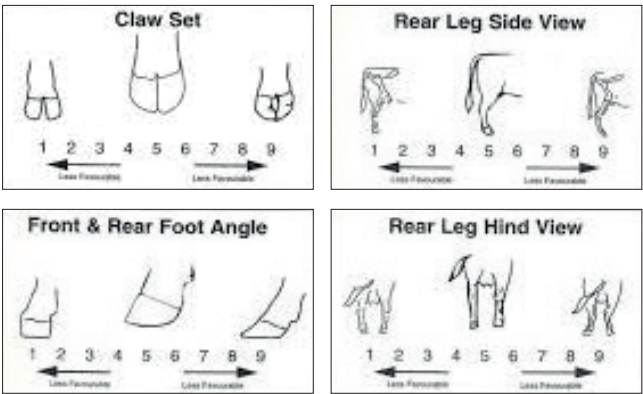

EBV SUMMARY

This is an EBV summary only and another group run (the Mid August TACE Analysis) will have occurred between now and the sale so please go on to Stocklive or Angus Tech to get the latest EBVs.

In regards to \$Indexes and Claw and Angle Scores for each bull we have listed their percentile bands as opposed to their EBVs as our clients have given us feedback that that is much easier to understand.

SCAN DATA

Scans were taken on 24 June 2025 for the 18 month bulls, and on 14 July 2025 for the 12 month bulls by Roger Evans (Accredited Assessor Number 1018).

COAT

Visual Coat Scores were assessed. Selecting animals for a sleeker coat may increase their adaptability. Scores are recorded on a 1 – 6 scale, with 1 being sleek and 7 being woolly. Coat Score 1 is extremely short, and found in some Bos Indicus and some of their crossbreds.

CT	Type
2	Very short
3	Fairly short
4	Fairly Long
5	Long
6	Hairy

FRAME

The height or 'frame' of cattle at a given age is closely related to maturity type. Smaller framed cattle generally have an earlier maturity pattern than larger framed cattle.

STRUCTURAL DATA

All structural Data was also scored independently by Roger Evans on 14 July 2024. Except for coat and Frame which was scored by us.

Codes for Structural Assessment

FC:	Front Claw Set
RC:	Rear Claw Set
FA:	Front Feet Angle Feet
RA:	Rear Feet Angle
RS:	Rear Legs (Side View)
RH:	Rear Legs (Hind View)
LM:	Muscle Score
TEMP:	Temperament: 1 to 5, lower score more favourable
SN:	Sheath/Navel: 1 to 5, lower score more favourable

The two summaries (18 and 12 mo) are different contemporary groups and scan data was taken on different dates and they were raised in different conditions – they should not be compared as such.

Introducing NEW SIRE GROUPS

HART NETWORK

LVVF TANKER

BEN NEVIS RAMBO

MILLAH MURRAH TINY DANCER

DUNOON SUNSTONE

New Sire groups this year include **Hart Network** who has impressed all that have used him for his power and thickness and depth- they stand down hard on the scales and are eye catching and commanding in the flesh.

They nailed it when they named our next new sire **LVVF Tanker** and just wait til you see them. Upstanding, big and powerful they absolutely pack a punch with the most incredible birth to growth spread. They mature well ahead of the average Angus bulls looking like real men at just 12 months of age and yet they keep growing. We went to see his progeny in Peak Dot in Canada in November 2024 and went on to use him well.

Millah Murrah Tiny Dancer is a highlight in the yearling bull section. They are the type of calves you get excited about, with broad, masculine heads, long, strong spines and enormous growth. The quality in them is undeniable.

PROVEN PERFORMERS

Our most successful purchase sire to date has been **Dunoon Sunstone** and although we purchased him as a walking sire his use and re-use has been so high in the industry that he has had a permanent home at TLG lately and we have been left using semen like everyone else. The biggest highlight for us are progeny reports from other breeders. He breeds big, deep and soft with exceptional females and docility a feature. He corrects hip to pin and tail head set up.

Our two Pathfinder purchases in **Pathfinder Seismic** and **Pathfinder Underdog** have made us very happy and have standout offerings in the top pens of yearlings. The docility of both these bulls is a real credit to the Pathfinder program.

Rounding out the group is our very own **Rambo**. We used four of his sons this year in our Autumn joining who met the highest grade for type and performance and they will feature in the sale from Lots 11 – 14. Rambo has the largest and most consistent offering in the sale with that elusive mix of marbling and muscle in a completely outcross package. He is our edge going forward.

PATHFINDER UNDERDOG
Pictured at 14 months

PATHFINDER SEISMIC
Pictured at 30 months fresh out of cows

These 18 month old bulls do not have to be treated any differently to two year olds. But like their twelve months old counterparts they still have many of the benefits of being younger, lighter and more agile than bulls used first as two year olds.

AUTUMN DROP

16 – 18 MONTHS OLD

We are holding nothing back by starting the sale with this impressive sire. He is strong, big, stylish, thick and is a real athlete with a sires outlook. Of all our highly rated Donors it is his dam Dormist N202 who is the star of this great run of bulls. N202 has produced three cracking full flush brothers in Lots 1, 55 and 62 and has three daughters that have each produced a star lot in Lot 11, and the standout yearlings Lot 30 and 32. Maternal brothers include Uno Macho U238 20K to Melody Rynne, Rin R223 28K to Pete Stevenson and Skytrooper 28K to Garth Hancock.

How many big boys are supple and can glide like this with this with so much presence? He shows you that you can have natural thickness, softness and capacity in one. He is the headline act from a fantastic flush of 5 brothers in this sale (Lots 67, 68,73 and 74) that carry the thump of their famous dam, Jean M72 with our popular sire Ben Nevis Rambo. His full brother Tasman sold for 30K to Bulliac with maternal brother Shrek S4 selling for 26K to Andrew Deans.

A massive unit! Because of his traditional shape you really have to get along side to realise the enormity of him. He stands down hard on the scales with a bone crushing 1st in the weight and average daily gain in his contemporary along with the highest scanned EMA. He is easy doing, quiet, well-bred and we think he has a big future. He is a full brother to the following lot and Lots 34 and 58. In previous sales his maternal brother was also Lot 4 selling for 25K to David Orr, with R138 starring in the ASPB purchased by Craig Atkinson for \$24k. Semen retained.

This is the full flush brother to the previous lot (as well as Lots 34 and 58) and holds his own in the Lot 5 space. Just like his brother this guy is simply, big, square and deep. P153 stamps them that awesome head and dude quiet temperament every time and we love it. She has sold embryo's into Spain and Denmark. His brother last year also made the Lot 4 bull showing how consistently she hits a home run.

The bull oozes quality from his soft skin to his overall thickness and capacity. He is beautiful through the chine and the shoulder and ties deep in his quarter. The combination of this with his, docility, data set and the 4 magnificent donors stacked each side of his pedigree make this a rock solid opportunity.

I have a real soft spot for this bull he just oozes old fashioned quality with a silky, soft seat to his pants that culminates in that special inverted triangle at the base of the muscle seam that you only find in the good ones. With easy fleshing, deep sides and beautiful nature this is a special bull. His maternal Brother Top Tier T28 sold for stud duties at Bald Blair Stud in 2023.

There is a beautiful skin on this bull with so much fleshing ability. We see a lot of quality in him and are very impressed with his lovely deep rib and quarter and again that classic head that is so important to us. Last year his maternal brother was also in the 1st pen standing at Lot 3 and selling to Annie Reen, Karoo Angus Stud Bathurst.

 **Used in Herd** – Waldo is a bull with tremendous scope combining docility, performance, carcase and maternal strength. He blends two of our strongest cow lines Dormist (N202's daughter) and Celeste in the one bull, and with his phenotypic excellence he was an ideal choice to fold back into the herd. He had a mob of 40 stud heifers for 6 weeks this Autumn join. He was the heaviest bull in the contemporary before being selected to use, and despite being used heavily and pulled out of the contemporary he still posted the 4th highest overall weight, and =3rd EMA. His Grandam is our impressive N202 Donors whose progeny are kicking all the goals here. Semen retained.

Used in Herd – Wizardry stands out for his with natural fleshing. After backing up the Autumn cows we collected him with conventional and sexed semen in the Autumn. While he was used he will still grow into a big bull and like his dam be deep ribbed, soft skinned and easy doing. His dam was one of 24 beautiful cows that went to Glencorrie after our female sale and she was IVFed before she left. See her picture online, she is a stunner and has been an exceptional cow for us selling 4 bulls in the sale to 20k. Semen retained.

Used in Herd – Weapon is an exciting bull with early explosive growth and then a more moderate mature frame. Given his outstanding early performance and good type and skin we selected him for in herd use with him ticking all the boxes and he also helps us underpin the gains we have made in marbling. He was joined with a mob of 40 heifers for 6 weeks this Autumn join. He is a genetical (same sire and MGS combination) to lot's 25 and 87. Semen Retained.

What a hunk.

He is one of the best herd improving bulls in this sale both on paper and in the flesh and he goes back to old fashioned quality factors but with extra punch. He easily leads out this third pen and whoever gets him gets a "hats off" from us. His dam sold to Brad Fazarri in our female sale for 18k as a 6 year old after with 3 sale bulls to her credit topping at 18k to Roger Jeffries into his renown Brahman herd.

BEN NEVIS RAMBO R230^{PV}
BEN NEVIS CELESTE J121^{SV}

This is a big frame, later maturing bull a big hip and rib in him. He is a machine and ranked =3rd for rib and =3rd for IMF. This is a contemporary of 84 bulls in total so that's exceptional performance. He's the kind of bull you could accelerate positive change with over smaller framed cows. His maternal brother sold to Don McRae in 2022 for \$32k.

Witchcraft is a very stylish, slick skinned young son of our prize donor Ben Nevis Jean S47. He offers a wealth of quality and genetic depth and he scanned =2nd for IMF in this very large contemporary of over 80 bulls. S47's granddam is the \$82k Jean H215, and her embryos recently sold for \$5,900 to Stevensons Down T Ranch in Montana. He has an ET brother in Lot 45 and his maternal brothers sold to Wattletop Angus V470 20k, V475 Karoo Angus 18k and V477 16K to Excel Genetics.

Watchdog is an exciting prospect. He has enough muscle shape to carry it up high along his spine and he has that extra scope about him and is the 2nd highest weight gaining bull in the contemporary. His dam was supposed to be the next big donor for us as the 40k Jean N17's heir apparent but she was injured in a heavy heat with the big Donors before she went into export collection and we had to sadly put her down. Our faith in her was founded when you see this guy.

BANG FOR YOUR BUCK – YEARLINGS BULLS

We have led the way with yearling bulls and believe vehemently their use is key to increased farm gate profitability.

WHY?

1. Yearling bulls are out working while they are still relatively light and agile, so they are less likely to hurt themselves. Just as importantly, they are less likely to damage your valuable heifers or cows.
2. Yearling Bulls fight less, so are less likely to get injured by accident or misfortune. Why? Well they are out working when they reach sexual maturity instead of being run with a mob of bulls to grow out to two years of age. As a result we believe they don't learn the bullying and riding behaviour that often occurs in bull mobs from 18 – 24 months of age with sexual frustration. We get overwhelming feedback from our clients that the bulls used first as yearlings are easier to manage both in and out of the cows and in their bull mobs.

Not everyone can produce yearling bulls as they need to be well grown and sexually mature when they first go out. This is our speciality and we have been growing and using yearling bulls for over 30 years.

GUIDELINES FOR USE

For their first year only

- 12 to 14 mo yearling bulls – one bull to 35 females
- 18 mo yearling bulls – one bull to 50 females

Join him normally thereafter.

Consider the first year a bonus for you plus the fact he should get a longer working life over a bull first used as a 2yo. He will look his worst after the first joining as he has been working and growing at the same time but don't worry his sex life won't kill him and as long as you put him in a good paddock and treat him for pests and disease he will eventually grow out to be the dashing bull he was born to be.

FERTILITY POLICY

Please read our Fertility Policy on Page 3. We have adopted this policy with reference to two others who share similar views, Millah Murrah's Ross Thompson and Chris Hallett of Coolah Vet Clinic. The policy itself was written by Ross.

THERE IS ONLY ONE RULE

Don't put him out in group joining with older bulls for his first joining. Join him either on his own or with a group of yearlings.

For all enquiries, questions or problems, please call Stu on 0417 674 412.

We have three of the best bulls we have bred at the start of this yearling bull section but there is unanimous admiration for this bull in the way he combines extreme presence, with an exceptional phenotype and that data set which in itself is outstanding. He is effortless and it's a privilege to have bred him. He will add a classic Angus head, improve feet, tail set, strength of spine and add fleshing ability. He did suffer a setback after being blooded but should be back to his best by sale day. He ranks =2nd for P8 and =2nd for EMA in a strong contemporary. Semen to be retained for in herd use.

Wrangler has such a lead on all other bulls in this yearling bull section not only for his leading weight performance, but he was the first to look like a bull and muscle up and he will just keep going. He is very hard to fault and is exactly what we aim to produce. He brings everything together, - His dimensions are superb with natural thickness, softness and balance and he is just so quiet. I'd take him home any day of the week. He ranks 3rd for ADG, equal=1st for P8, =2nd for EMA and 3rd for IMF. Semen to be retained for in herd use.

Back in the day we used to show and even won a few Grand Champion and interbreed titles at Royal shows. This bull is good looking enough to have been not just a show bull but one of the special ones. His dam is Donor N202 and she's a diamond for our herd. His 3 maternal brothers feature as a flush in the 18 mo section in Lots 1, 57 and 62. He is not only Hollywood handsome, but he has serious performance on paper and in the flesh measuring 2nd for ADG, and scanning =2nd for EMA. To us he is everything that is our Ben Nevis edge. Semen to be retained for in herd use. Please check updated EBVs online from 18/8/26. Pictured on page 33.

This bull has been a silverback from an early age and you can see the enormous growth potential and capacity in him. His Donor dam sold for \$24K in our recent female sale to Phil Redding and her body capacity and softness was exceptional. She has sold two other sons into bull breeding duties including S360 to Andrew Clarke for 22k and Rochester R110 to Dean Frederickson for \$18k, and also Valiant V445 to Andrew Lawrence for 18k. If you want to breed phenomenal females he is your man- he is very quiet with a long, deep muscle pattern. He is the performance bull of the true yearlings ranking first for weight, equal 1st for P8 and 1st for EMA. Please check updated EBVs online from 18/8/26. Pictured on page 34.

Up headed and stylish W268 will grow into a very big and powerful bull. We love his overall balance and the way that his shoulder blades mesh so neatly into his spine for such a meaty calf. The overall appeal of this bull is very high- we rate him as a real contender. He scanned equal 2nd for P8 and =2nd for IMF. Impressive. His dam R403 sold to Bernard Waters for 22k at our recent female sale. Pictured on page 34.

Oof – there is beautiful softness and fleshing ability in this bull. He is very smooth in his lines. Like all the good ones he has the inverted triangle in the seat of his pants that comes with the perfect combination of muscle bulge into the seam and a silky coat. With his kind nature, capacity, softness and that data set he deserves stud inspection. His Grandam is the impressive N202 cow and she stamps her quality all over him.

We are excited to introduce to you our Millah Murrah Tiny Dancer calves. Once this crop was on the ground, we used him again in both AI and ET knowing he would breed the type of cattle that would suit our clients with extra stretch, softness and quality. W361 is one of my favourite characters and is a bit of a busy body and a Houdini - he licks chains and open gates for amusement. He has a beautiful head and skin and is deeper and softer than most of the other bulls here. He scanned equal 4th for IMF.

Isn't this upstanding calf a real eye catcher with lots more scope to grow and continue to fill out. He just cracks a pace and gets out and moves with his excellent structural base. The longevity in his structure combined with his docility and the depth through rib and quarter means he would produce superb daughters. His dam has had four bulls make the sale.

Watch the perfect balance and sire appeal as this young sire walks off with his head held high. That takes structural integrity and symmetry. Combined with his impeccable data he is worthy of close inspection. His pedigree is one we are most excited about as he combines the softness, bone and thickness of True North with the extra scope, foot and inherent carcase merit of Real Deal. He ranks equal 1st for P8 showing he adds do-ability to the mix and is a real show-off and a character.

I expect cattle men and women to spot this bull in his pen as he has that real look at me. It's a delight to breed an animal that is so neat and balanced, that just oozes style and exhibits not just thickness along his top and over his hip but softness. A brother to his dam sold to Boambee last year for \$20k (V113).

Gee Underdog has bred well for us. Balance is one of the key traits he transmits and you can see that in this fella. He's longer but carries a lot of that extra length from hip to pin which gives him better angles and balance to step up nicely and flow smoothly. Thickness and softness is the combination here plus some extra style. Nice. His dam is a full sister to Sorcerer S228 that sold to Tim and Cindy Lisle for \$22k. Pictured on page 37.

We just love the uniqueness of this pedigree and genetic combination and the fact it combines the very best of Millah Murrah and Ben Nevis. How about the extra length especially over the primals and the muscle dimension there. You'd have to say he's an absolute train this bull and will transmit that great head. S47's embryo's have sold all over the world now to the famous Stevensons program in Down T Ranch, Montana and all the way to Spain and Denmark. S47 is our next generation Queen Jean and even at a young age one of our highest earning cows.

Pythagorus has been a such a great bull for us injecting carcass and just breeding the most exceptional line of daughters that we Bulliac, and Ardrossan all treasure. The performance in this young bull is exceptional with him being slightly younger and one of the heavier bulls. He is great in behind the shoulder, he's long and he has stand up and look at me written all over him. Like all the Pythagorus he transmits that placid nature.

 TE MANIA KIRBY K138^{PV}
 TE MANIA BEEAC M122^{SV}

The outlook on this bull is just lovely and facilitated by his shoulder placement and angle. This allows him his head up and the full stride at the front which sets up the structural correctness throughout. We love the suppleness, the silky skin and the clean seat to his pants. You don't get that inverted quality triangle up the seam of his pants without muscle and softness and he has both. He scanned equal 4th in IMF as his skin would indicate.

W705 has real presence and if you know his magnificent Donor Dam N238 you'd understand why. She was the Lot 1 star and sold in our recent female sale to Ballawinna Angus for \$42,000, her embryo's broke the Australia record last year for \$6k each (Mackas Angus), and her dam broke the then Mature Record in 2020 for \$82k. 705 is an absolute ball tearer. Just get behind him and look over his spine and appreciate the pure muscle mass and extra swagger he has. This is N238's best bull, and she has produced many of them for us. He has a small patch of white in front of his testicles.

This exciting bulls' data credentials along with the maternal strength of his pedigree makes him a real prospect. His maternal brother was accepted into the ASPB last year and sold to Boambee Angus for stud duties. His dam is a maternal sister to the \$56k Undertaker U63 that sold to Palgrove. His Grandam N119 sold as an 8yo cow for 24K to Mark Noller. While all but two of the bulls in sale get a 1 for temperament some are even quieter than that and W103 is one of those. He is so smooth in all his angles with extra scope.

BEN NEVIS CELESTE J121^{SV}

A very soft, very meaty bull who is supple throughout his spine. He is up headed and free moving. He combines the best of the absolute thump and fine skinned quality of his dam with the robustness and extra carcass of Rambo. It's a perfect match and one we replicated after seeing Tasman who sold to Ben Hill in 2023 for \$30k. He ranks 1st for IMF so he combines real muscle with high scanned IMF in a large contemporary which is a real achievement and is he is a full flush brother to Lots 2, 67, 68 and 75.

Two full flush brothers here that celebrate our genetic edge and have the maternal ticket to Ben Nevis Jean. This guy has Jean H215 (82K) as well as her star daughter M30 who along with N238 broke the Australian record for embryos sold at auction in 2025. This is a big frame, free moving bull who is very smooth in his make up with a long neck and attractive profile with that characteristic skin. This great front combined with his birth weight and calving ease make him an ideal heifer bull while you fold in Jean.

The depth of the draft is something we are very proud of and to have bulls this powerful and balanced still coming through the ring makes us very happy. Classic M30 (my fave cow) here with that strong head, big top and expressive quarter wrapped in a layer of silky skin. A real sire here. He is a flush brother to Lots 22 and the previous bull and is a half brother to lot 79. This combination with Rambo combines our fave bull and fave cow.

A fair bit of 'look at me' in this bull. He has good skin, base width and a silky seat to his pants which indicates quality. This is typical of his dam's legacy with many sale toppers in her progeny list. She was one of our greatest donors and she sold in our female sale earlier this year for \$40,000 to Bullio Farming. He is a flush brother to Lots 20 & 64.

Combining the \$500,000 top selling and highest registration sire in the US with the very best Ben Nevis genetics, this young sire is exciting. He doubles up on good skin from both sides and a proud outlook. In the flesh he combines smoothness and squareness, and is very docile with a good head. He is a maternal brother to lots 22 and 76.

The first thing you notice about this bull is that he is extremely quiet. In fact, his sire group by the Pathfinder Seismic bull are notable for this and it's a real asset. He is very a tidy package starting with his feet and right throughout his skeleton which gives him balance and outlook. A good package.

We sold his sire to Boambee for \$100,000 in 2024 and this is our first calf out of the super N17 cow. We've doubled up on skin and quality here and he has extra fleshing as evidenced by scanning with the most P8 fat. Genetically this pedigree is royalty and we have so many more in the pipeline. He would also make an excellent heifer bull with a smooth shoulder, long neck and a body type where he has muscle but everything just folds in neatly.

A young bull that is more moderate in his maturity pattern and he has the carcase and width dimension that comes with it. He's good on the plates which many modern Angus lack. Both his dam U211 and Grandam S367 are in the Donor pen and he has two brothers to his dam in Lots 52 and 77.

DAM **BEN NEVIS CELESTE U211^{PV}**

The history of **BEN NEVIS ANGUS**

ANCIENT HISTORY

The Steels came to Ben Nevis from Scotland in the 1860's. Our family is now fifth generation on Ben Nevis and Mingary. In the 1919 drought the Steels traded out of their Shorthorns into all Angus when their Shorthorns died on the river while the Angus grazed the hills. In 1926 they purchased a line of stud cows from Bald Blair and walked them 93 kms back home but their chains holding their stud number plates around their necks eventually wore off and they formed the basis of the commercial herd. Then after serving in WW2 under HG Munro from Booroomooka Bruce Steel, my father was inspired to start a stud. In 1947 he started his stud herd from the Abington Blackbird, Erica (always wondered how I got my name) and Gammer families. In the 50's he acquired and developed the females lines we are known for today the Jeans, Geraniums, Dormists.

Bruce and Cherry were married in 1969 and since then we have as a family lived and breathed the Angus breed.

MODERN HISTORY

When Stuey and I were first married in the late 90's, Stuey was a large animal vet and I was employed as his data collector and vet assistant. We were overpaid, bored and in my case hopelessly matched in my weaknesses to the tasks at hand... (think ADHD, dyslexia and inability to take instruction).

At 2am one cold morning trying to restrain and get a vein in a very sick and angry rottweiler we decided we wanted to be farmers. My parents ran Ben Nevis at the time, but we wanted to "earn the right" and do something for ourselves so we decided to lease 10,000 acres of unfenced State Forest and Pine Plantation and turn under worked and overpaid jobs in for ones where we lived only on the fumes of exhaustion for no money. I don't think we had ever been happier.

We had no land, no money and no cattle so we leased the land, borrowed the money and took on agistment cattle and seriously upgraded our fencing, mustering, tracking and forensic dung splatter skills. We started with speary horned Herefords and devons whose only ambition was to die and take you with them.

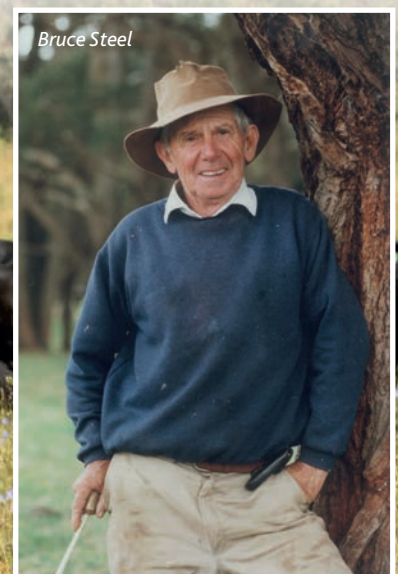

While we have always learned lessons the hard way the biggest thing we have learned is that you have choices. When you are busting a gut you may as well enjoy it and do something well, and it takes as much energy to run bad cattle as good ones. So we traded gorges, trees and snakes for natural lease land and the mongrel cattle for quality Angus heifers. Then with my parents guarantee and the banks help we purchased our first block of land.

In 2013 we blended our business with the much larger Ben Nevis Grazing Co and took over the reins. After selling bulls through the paddock successfully since 1947 with Mum and Dad we chose to go an annual on property sale to give clients better access to the cattle and us more exposure.

In the last few years, we have expanded our business model to grow and work with family. We have purchased 2 more properties and embarked on a PTIC Heifer Networking program where we buy quality Angus heifers, (preferably off our clients), and join them to the best Ben Nevis genetics) to sell each Autumn. In addition, we have grown and outsourced our Autumn embryo program to the wonderful Bulloch family at Braidwood which allows us to expand out 18 mo bull offering at sale time without having to run more cows through a Walcha winter.

Each time our choices have been underpinned by the importance of quality and people. We choose to work with family because they are our favourite people and together, we are stronger.

We expand our family with the choices to work with good people, and we'd like to thank all of them for their time, expertise and support. We'd like to think we have a little fun along the way too.

Thank you

A person wearing a blue shirt, jeans, and a cowboy hat is riding a dark brown horse. They are herding a group of black cattle in a green field. The cattle have white markings on their sides, including 'W729', 'H14', and 'W100'. The background shows a line of trees and distant hills under a clear blue sky.
